## Data Scientist

[LinkedIn](#) | +1 (762) 699-4561 | [bhanuvadlamudi96@gmail.com](mailto:bhanuvadlamudi96@gmail.com) | Marietta, GA

### SUMMARY:

---

Data Scientist with **3 years of hands-on experience** working on real-world data science and machine learning problems across academic and industry environments. Experienced in **Python, SQL, machine learning, statistical analysis, and NLP**, with a strong focus on data exploration, feature engineering, model building, and evaluation. Comfortable working with large datasets and explaining results in a clear, practical way to support business and analytics teams.

### TECHNICAL SKILLS:

---

- **Programming & Data Analysis:** Python, SQL, R, Pandas, NumPy
- **Machine Learning:** Linear & Logistic Regression, Random Forest, Gradient Boosting, XGBoost
- **Statistics & Analysis:** Exploratory Data Analysis (EDA), Hypothesis Testing, A/B Testing
- **Natural Language Processing:** Sentiment Analysis, TF-IDF, BERT
- **Big Data & Cloud:** PySpark, AWS (S3, EC2), Docker, Kubernetes
- **Data Visualization:** Tableau, Matplotlib, Seaborn

### PROFESSIONAL EXPERIENCE:

---

#### Data Scientist

May 2025 – Present

Perficient, Chicago, USA

- Working as a **Data Scientist**, supporting analytics and machine learning use cases based on real business requirements.
- Regularly work with datasets containing **hundreds of thousands to millions of records**, handling data cleaning and validation using Python and SQL.
- Built and improved predictive models, helping increase overall model performance by around **8–12%** after feature tuning and experimentation.
- Spend time reviewing model results and errors to understand **where predictions fail and how they can be improved**.
- Support deployment and testing activities using **AWS and Docker**, ensuring models can be reused and monitored.
- Share findings with team members and stakeholders in a **simple, non-technical way**, focusing on business impact rather than algorithms.

#### Data Scientist

Jan 2024 – May 2025

GoodRx, Texas, USA

- Worked on multiple applied analytics and research projects as a **Data Scientist**, handling both structured and text-based datasets.
- Spent a significant amount of time on **EDA and data understanding**, identifying missing values, outliers, and data quality issues early.
- Tried different machine learning approaches and compared results before finalizing models that showed **10–15% improvement** over baselines.
- Used statistical methods like hypothesis testing and regression analysis to **validate assumptions and results**.
- Worked on NLP tasks such as sentiment analysis and text classification using **TF-IDF and BERT**, mainly for research insights.
- Created visual summaries and dashboards to help others **quickly understand patterns and outcomes**.

#### Junior Data Scientist

Nov 2022 – May 2023

Tata Consultancy Services, Hyderabad, India

- Started my data science career by working on **data preparation and analysis tasks** under senior team guidance.
- Helped clean and organize datasets using Python and SQL before they were used for modeling.
- Assisted in training and testing basic machine learning models and reviewed results with the team.
- Created simple charts and summaries that were used in internal discussions and reviews.

- Gained practical exposure to **how data insights are used in real business decisions.**

## **EDUCATION:**

---

### **Master of Science in Computer Science**

Kennesaw State University, Kennesaw, GA, USA

**Aug 2023 – May 2025**

### **Bachelor of Technology in Information Technology**

RVR & JC College of Engineering, Guntur, Andhra Pradesh, India

**Aug 2019 – May 2023**

## **CERTIFICATIONS:**

---

- **AWS Academy – Cloud Foundations**
- **AWS Certified Machine Learning – Specialty**
- **IBM Machine Learning Professional Certificate**
- **Data Analytics with Python**
